

## Announces

# 2 Firsts for the Oregon Coast

### ◆ Chemistry Free Digital Platesetter.

Safe for the environment, no chemicals are required to develop printing plates anymore. High resolution output, directly from computer to plate produces sharper type, and smoother, crisper photos resulting in noticeably higher quality offset printing.

### ◆ Ryobi 4 color Offset Press

With the addition of this press we now can produce full color printing in one pass thru the press instead of two passes. Photos are printed at 175 lpi to produce sharp, clear color.

GATF  PRESSTEK  
A SMARTER WAY TO PRINT

**“For Quality Offset Printing” it’s Pioneer Printing - Newport, Oregon**
